Dear Sir or Madam,

The **European Society for Medical Oncology (ESMO)**, **UNICANCER** and **Cancer Research UK** are pleased to announce the 3rd edition of the MAP conference: *“Molecular Analysis for Personalised therapy”* that will be taking place at the Swissôtel in Zurich on October 13th and 14th 2017.

We would be very grateful if you could display the attached posters and distribute the information to your colleagues and partners. Grants are offered by the conference to Young Fellows as well as to abstract presenters.

While technological advances have revolutionised applications in personalised medicine, the interpretation of these molecular analyses remains a matter of debate. The MAP conference will explore ways to better use existing research data in order to improve treatment programmes for cancer patients and shines a light on the latest medical developments

This international event will attract medical oncologists, researchers, onco-geneticists, clinical investigators, molecular biologists, cytopathologists, radiotherapists, fellows, academics, regulators and industry R&D representatives.

For more information on the MAP conference:

- **Website:** www.map-onco.net
- **Email:** map@overcome.eu
- **Phone:** +33 1 40 88 97 97

We assure you a strong and dynamic exchange with scientific colleagues and look forward to welcoming you in Zurich this coming autumn.

With best regards,

Fabrice André
