

Multidisciplinary Immunotoxicity virtual Board

Sandrine Aspeslagh

UZBrussel

6th February 2021

National Multidisciplinary Immunotoxicity board

IT: immunotherapy for solid or hematological cancers

irAE: immune related adverse event

ICI: immune checkpoint inhibition

Dysimmunity: having an characteristic which might influence IT outcome (eg underlying auto immune disease, having previous irAE, chronic viral infection, severe allergy,)

National Multidisciplinary Immunotoxicity board

Goal

- Share experience about irAE between onco/hematologists and organ specialist
- Standardize approach for irAE
- Treat patients which would have been excluded from trials in a safer environment
- Find clinically relevant research questions
- Register severe irAE/special populations
- Excellent experience in several cancer centres in France (eg IGR)
